ASX ANNOUNCEMENT

Strong finish to 2020 for new Aquila in the Cloud product offering

IMEXHS Limited (ASX: IME) (“IMEXHS” or “the Company”) announces that *Aquila in the Cloud*, its standardised radiology solution launched in May 2020, has signed a total of 41 deals as at 31 December which are expected to contribute over A\$945,000 in Annual Recurring Revenue (ARR).

Aquila in the Cloud is a low-cost, rapidly deployed product offering that provides small to mid-size customers with access to IMEXHS’s innovative medical imaging technology. It has continued to generate widespread demand with customers now located across 11 markets including the USA, where the first customer signed in Miami on 1 December, has now gone live with a 30-day trial. The highly scalable business model is supported by an extensive and growing network of distributor partners and sales opportunities continue to expand.

IMEXHS Co-founder and CEO, Dr German Arango said: “The strong demand we are experiencing in multiple markets for *Aquila in the Cloud* reflects the gap which exists for a low-cost radiology solution that meets the needs of small to mid-size operators. Our affordable product offering provides us with a unique opportunity to democratise access to medical imaging which is currently not available to around two-thirds of the world’s population. At IMEXHS, we firmly believe that *Aquila in the Cloud* represents an important step forward to improving the health outcomes of communities across the globe.”

Authorised for release by the Board of IMEXHS Limited.

About IMEXHS

IMEXHS Limited [ASX: IME] is a leading imaging Software-as-a-Service (SaaS) and ancillary solutions provider with over 120 customers on recurring contracts in over 250 sites, and distributors in 15 countries. Founded in 2012, IMEXHS is known for its innovation in the imaging services market, offering flexible and scalable imaging solutions via its HIRUKO branded suite of solutions for next generation Picture Archiving and Communications System (PACS) and integrated medical imaging systems (including a Radiology Information System (RIS), a Cardiology Information System (CIS) and an Anatomical Pathology Laboratory Information System (APLIS)). The HIRUKO™ system is completely cloud-based, vendor neutral and zero footprint with no need for installed software. The IMEXHS products are designed to increase productivity and save money for end users, with a scalable platform that is configured for the future and enhances patient outcomes.
